PROFESSIONAL EXPERIENCE

Software Developer (Full Stack) – Good Greek Moving and Storage (2022-2023)

- Developed a new full-stack CRM system by designing and implementing scalable front-end and back-end solutions, improving workflow efficiency by 20% compared to the legacy CRM, leading to enhanced productivity and user experience.
- Collaborating with the UI/UX department to improve the user interface, resolving technical issues, number of clicks, redundancies, and clarification of data by 80%.
- Worked in an agile environment by actively collaborating with team members and cross-functional departments, ensuring the timely delivery of high-quality solutions that met business needs.
- Interfaced with customers by gathering requirements, addressing concerns, and providing solutions, ensuring expectations were met and strengthening stakeholder engagement for better collaboration.

IT & Receptionist – LXStudio INC. (2020 – 2022)

- Managed front-desk support by serving as the first point of contact for clients, handling calls, and scheduling appointments, creating a lasting business-friendly environment with new and returning customers.
- Provided thorough and efficient troubleshooting by conducting hands-on inspections, applying quick thinking, and performing on-the-spot critical analysis, resolving 90% of technical issues within 9 hours to minimize downtime and maintain operational efficiency.
- Troubleshoot complex environments and A/V equipment, systematically isolate issues and document them through ticketing, optimizing issue resolution and ensuring seamless facility operations.
- Assembled computers and configured event spaces based on client specifications, ensuring the conference rooms are equipped with the right tools, supplies, and functional hardware, resulting in positive feedback on service quality and attention to detail.

Server – Hunan Garden (2023-Present)

- Provided exceptional dining experiences by taking orders and addressing customer concerns resulting in repeated customers.
- Managed multiple tables simultaneously in a fast-paced environment, ensuring timely service minimizing miscommunication.
- Worked closely with kitchen staff, bussers, and other servers to guarantee smooth operations and positive customer service.

SKILLS

- Programming Languages:** JavaScript, HTML, CSS, C++, Python
- Framework/Libraries:** React.js, Next.js, Node.js, Express, Framer Motion, Redux
- Databases:** MongoDB, MySQL, Firebase
- Customer & Stakeholder Engagement** Requirement gathering, expectation management, front-desk support
- Methodologies:** Agile, and Scrum
- Tools:** Git, GitHub, Figma, Material UI, Tailwind, Bootstrap, Framer Motion, Docker, Postman, Power BI, Tableau, Excel,

CERTIFICATIONS

- Flutter Mobile Application Development – University of Central Oklahoma (2021)
- Workforce Advantage – University of Central Oklahoma (2021)
- Data Analytics – Alex Analytics Bootcamp (2025)

EDUCATION

Bachelor of Science in Computer Science (In Progress) – University of Central Oklahoma

Commented [DL1]: Why I worked only for a year with this company is due to the contract has ended and the company had a reduce in force. I loved every moment being a developer but I am currently exploring other paths to see if I am a better fit.

Commented [LL2]: Can this % be justified?

Commented [DL3R2]: Improving 20% is due to the reduce numbers of clicks and time spent on an action from the start and to the end of a job. Processing potential leads to utilize quicker, resulting in 50% more uptime (not sure if that's the right word, maybe engagement like doing the job instead of figuring out where and what things are) on a job.

Commented [DL4]: Resolving the technical issues that old legacy CRM contains such as reducing the amount of clicks needed, and eliminating redundancies of the existing CRUD method needing to go through roundabout ways to delete and edit. With the collaboration of the UI/UX department we improved the entire interface and interaction to give a seamless look, and experience for the user. Improved UI/UX worked hand in hand in reducing the amount of clicks needed by displaying key data in areas that are necessary.

Commented [LL5R4]: Can the percentage be justified?

Commented [DL6]: The points added at the bottom of this feels more in depth but let me know if I should keep this or just the bottom ones

Commented [LL7]: Lets make this more concise, all saying the same thing basically.

Commented [DL8R7]: I shortened it to just one word: Lasting

Commented [LL9]: This is a very specific metric, can this be justified?

Commented [DL10R9]: Changed it to 90% for more general metric as we do have multiple different categories of off time inspection and on the spot inspections. This metric demonstrates that on the troubleshooting resolves 90% of the issues before and during an event. The remaining 10% does not mean its not resolvable, but with work arounds that usually partakes more time.

Commented [LL11]: I think "leveraged" is a bit too much here and is indirectly stating it, when you already directly state it later.

Commented [DL12]: Optimizing instead of streamlining

Commented [DL13]: Reworded instead of seamless setup

Commented [DL14]: My experience with my current job at Hunan Garden has taught me a lot and gave me a chance to improve on my current skills in time management, multitasking, attention to detail and efficiency when managing 6+ tables. Since it is full house every night with customers packed from the lobby to lining up outside I am able to learn the ins and outs of the food industry fairly quickly.
